

Risk Disclosure

Effective date: 07 September 2026

1. General Risk Warning

Financial markets involve significant risk and may not be suitable for every person. The value of financial instruments can rise or fall, and a person may lose some or all of the capital committed to trading or investing.

2. Market Volatility

Prices may move rapidly due to market conditions, economic events, geopolitical developments, liquidity changes, announcements, or other factors. Market conditions may affect spreads, execution, liquidity, and trading costs.

3. Leverage

Where leveraged products are available, leverage can increase both potential gains and potential losses. A relatively small market movement may result in a significant change in account equity.
